

Lead Full Stack Developer

How to Apply:

Please submit written interest with a cover letter and resume to careers@scripthhealth.co

About Us:

Script Health (<https://www.scripthhealth.co>), a Public Benefit Corporation, is a secure pharmacy service that provides easy access to essential and life-saving medications to improve health equity. The company is Pharmacy certified by the National Association Boards of Pharmacy. Script Health supporters include the Clinton Global Initiative, MIT, and the University of Chicago.

We are funded by angel investors and have a board of 4 advisors along with the support of Softbank Investment Advisors, MATTER healthcare incubator, and the Polsky Center of Entrepreneurship at the University of Chicago.

Your Mission:

Your mission is to bring your talent and passion as a full-stack developer who will lead the development of our flagship product from scratch. In this position, you will:

- Be a thought partner to the product, design and the executive team in building our web application.
- Contribute to our end-to-end product lifecycle for our application. This will include the technical analysis of requirements, development of the software, builds, deployment, monitoring, and feedback.
- Assist in building the backend workflows and the frontend presentation.
- Shape the future of the company and its culture

Your Scope of Experiences:

Think you have what it takes to join our team? We're looking for someone who can commit to a full time engagement:

- BS degree in Engineering, Computer Science or a related field. In lieu of degree, relevant work experience and/or trade school is acceptable
- 4+ years' experience in software engineering in a functional or object-oriented language (Python, Javascript etc.)
- HTML/CSS/JavaScript experience (knowing Bootstrap is a plus)
- Solid grasp of engineering principles, test-driven development, and CI/CD process
- Passion, collaboration, and productivity in a dynamic cross-functional team environment
- Adaptability in changing work environments, managing new priorities, new instructions, delays, or unexpected events
- Experience in healthcare, digital healthcare delivery, and/or early-stage companies preferred

A typical day might include: designing overall architecture of the web application, creating web services using Java, creating front end using Angular, creating test cases, and documenting design and code.

The nature of work is interdisciplinary, and our teammates come from varying backgrounds. We urge you to apply even if you feel uncertain that you have the exact background.

Compensation

- The compensation for this position promotes equity-based incentives to the hired candidate. This position is full-time. The salary range for this position is flexible depending on the candidate's experience, but competitive for a seed stage company with an opportunity for an immediate raise, and/or bonus based on meeting or exceeding fundraising goals.

Why Join Us?

- These are a few of the many benefits to working with an up-and-coming startup.
- You will be one of the first developers working collaboratively with a talented team of seasoned product and healthcare leaders
- We were recently selected to be in SoftBank and WeWork Lab’s accelerator program, Emerge. Read about us on TechCrunch.
- Our clients and stakeholders include a group of leading technology and healthcare organizations. They include the following:
